

# Bringing purpose into business

Steve Mecieca

QuickLets and Zanzi Homes both form part of the QLZH Group. The group is rooted in Malta, proud to retain its locally built brand. After 5 years in operation, QLZH has over 380 agents with 30 offices making it the fastest growing real estate franchise business in Malta. Our mission is to provide exceptional client service, promoting a culture of self empowerment within our teams and creating a sense of purpose within our brands as a whole.

The QLZH Group is built upon these three pillars;

- Innovation - To innovate the Maltese real estate industry
- Diversity - To create a diverse culture
- Community - To give back to people who are less fortunate than us

The QLZH Foundation is the social impact voluntary organisation of the QuickLets and Zanzi Homes brands, managed by the QLZH Group and was officially launched on Thursday 11th of January 2018. The Foundation's Honorary Patron is Her Excellency, Marie-Louise Coleiro Preca, President Emeritus.

The Foundation is built on 5 main goals;

Plant a tree for every property we sell,

Educate a child in Africa for every property we rent out in Malta,

Build a school in Africa,

Plant 1 Million Trees over the course of 10 years,

Build a home in Africa for every home sold in Malta.

With every **property** we rent,  
we **support** a  
**child's education** in Africa.

#EducateTheKids

## Personal Growth

Educate a child in Ghana for every property we rent out in Malta.

- The future of our planet is dependant on the supply of quality education to the younger generations.
- In 2018, we started to sponsor the education of a child in Africa for every property we rent in Malta.
- In Ghana, the QLZH Group donated 500 books to be used by hundreds of students in the coming years.

## Environment

Plant a tree for every property we sell.

- The QLZH Foundation has pledged to plant an indigenous tree in Malta for every property sold through Zanzi Homes.
- So far we have so far planted or distributed over 800 trees. We have planted these trees on public land in collaboration with local councils, private residences and primary schools.

## Schooling

Build a school in Africa.

- After our trip to Ghana in 2017 where we supplied internet access to a school and its community, we toured two schools and were motivated to return back with plans to build a school.
- In 2018, the QLZH Foundation commissioned studies to understand the feasibility and budget requirements to make this dream a reality.

## Sustainability

We believe that the environment has been heavily neglected and a long term plan is required to rectify and sustain a greener future.

- Saggar - Plant 1 Million Trees over the course of 10 Years
- Committed to no single use plastic in our offices
- 'Ocean Bed Cleanup' initiative
- 'Plastic Police' Beach Cleanup

**1.6 BILLION PEOPLE**  
LIVE IN BELOW STANDARD HOUSING CONDITIONS

---

**OUR MISSION**  
IS TO BRING THAT NUMBER DOWN

---

**JOIN OUR VISION!**

## Housing

Build a home in Africa for every home sold in Malta.

- 1.6 billion people live in below standard housing conditions across the globe. Our goal is to bring that number down.
- The QLZH Foundation's long term vision is to improve or build a new house in Africa for every one sold in Malta.

## Saġġar

Saġġar is a proactive collaboration between the QLZH Foundation and ACT. for the ecological rehabilitation of the Maltese islands.

- Saġġar aims to sow and plant a million trees and rehabilitate ecological reserves, public land and private lands.
- Kattar - Kattar focuses on the collection of seeds and cuttings, the germination of native flora species, awareness campaigns to increase the appreciation of our ecosystems.
- Saġġar seeks to enhance, restore and rehabilitate areas or habitats; by means of collaboration, research, ecological considerations and integrated conscious designs to facilitate the integration of the people with their environment.
